

Pig Launchers / Pig Traps: Features

Key Features:

- Packaged Units: Equipped with piping, valves, advanced instrumentation, and quick-opening closures for efficient operation and maintenance.
- Robust Construction: Designed to withstand extreme conditions, ensuring durability and reliability.
- International Certification: Vessels can include ASME U Stamp certification and comply with industry-specific standards.
- Versatility: Designed to adapt to a wide range of applications in hydrocarbon and fluid transportation systems.
-

Benefits:

- Facilitate pipeline cleaning and preventive maintenance.
- Enable internal inspections using intelligent pigs.
- Include operation and maintenance platforms for safe and ergonomic handling.
- Fully integrated solutions ready for immediate operation with all necessary components included.

Applications:

- Hydrocarbon transportation in gas and oil pipelines.
- Fluid separation and handling in transportation systems.
- Maintenance and monitoring operations for high-pressure pipelines.
